PHOENIX

Know Us Better

About us

Phoenix Aviation is a certified international Air Operator that has offered Aviation and Air Ambulance service for over 28 years. Our services have spanned throughout the globe. We have capability to fly into remote locations, major international destinations as well as conflict zones.

Our Base

We are based out of Wilson Airport in Nairobi, Kenya and have a 24/7 Operations and Emergency call team that are ready to help you navigate options suitable for your medical emergencies and patient needs.

Our Compliance

We comply to the highest standards of Air Medical transport and some of our accreditations include EURAMI (European Aeromedical Institute). The Phoenix Air Ambulance service is patient centered and is comprised of a team of expert critical care medical professionals and highly trained flight crew.

Our Quality Assurance

Our aircrafts come fully fitted with the latest aeromedical transport equipment which includes advanced airborne ICU units. We have advanced capability and experience with infectious disease control and are committed to keeping up with the latest developments in aeromedical transport.

Our Fleet

All our Air Ambulance aircraft are fully fitted with intensive care equipment, enabling the transportation of critical patients on short and long-distance flights.
